

Program

SCI Agentathon 2026 · Tuesday, 26 May · KTH Library and Teknikringen 8D

Day in one line

Plenary opening, two coding sessions in track rooms, cross-track update after lunch in Salongen, end-of-day live demos.

Schedule

Time	Activity	Where
Morning plenary		
08:30 to 09:15	Arrival in Salongen (card-holders from 08:30; KTHB opens to all at 09:00)	Salongen, KTHB
09:15 to 09:20	Welcome and house rules (Fredrik Lundell)	Salongen, KTHB
09:20 to 09:45	Agents. What are they? (Artem Kulachenko)	Salongen, KTHB
09:45 to 09:55	Live demo (Artem Kulachenko)	Salongen, KTHB
09:55 to 10:05	Three-minute track introductions by each track lead	Salongen, KTHB
10:05 to 10:15	Sub-team formation	Salongen, KTHB
Coding session 1		
10:15 to 10:30	Hands-on starter in each track room (track lead runs it)	Track rooms
10:30 to 12:00	Coding session 1: sub-teams build their first deliverable	Track rooms
Lunch and cross-track update		
12:00 to 13:00	Lunch (lunch boxes catered to Salongen at 12:00)	Salongen, KTHB
13:00 to 13:15	Cross-track update: 3-minute status per track	Salongen, KTHB
Coding session 2		
13:15 to 15:45	Coding session 2: sub-teams converge on a demoable result	Track rooms
15:45 to 16:00	Sub-teams move to Salongen and set up for demos	Salongen, KTHB
Demos and wrap-up		
16:00 to 16:45	End-of-day live demos: one short demo per sub-team	Salongen, KTHB
16:45 to 17:00	Wrap-up, lessons learnt, next steps	Salongen, KTHB
17:00	Close	

Track A: Course syllabus to teaching assistant

Lead: Artem Kulachenko, Jonas Sellberg. Room: Salongen, KTH Library (KTHB).

Two or more sub-teams in parallel: grading and feedback agents, student-facing question-and-answer agents, etc.

Track B: Research and HPC workflow agents

Lead: Marco Laudato. Room: Faxén, Fluid Mechanics lab, Teknikringen 8, floor 1.

Sub-teams pick a direction: orchestration on the cluster, agentic debugging, or an interactive postprocessing agent.

Track C: Open Agent Exploration: KTH systems, knowledge work, and lab automation

Lead: Wei Ouyang. Room: Hållfasthetslära seminarierum, Teknikringen 8D, floor 1.

Open exploration, no fixed tutorial. Wei will show a starter set of agent tools, then participants will pick what they want to build. Natural home for administrative workflows (eISP, scheduling, document review), retrieval-augmented knowledge agents, and lab automation.
